Lock out NS-sähkölukolle, oikea (vasenkätinen ovi)

- Kahvaratkaisut
- Lock out -laitteet
- Liitoskaapelit

TUOTEKUVAUS

Kahvat ja tarvikkeet sähkölukoilille

Error-proof operation

To prevent unintentional guard closure, simply move the red door upwards so that the actuator entry hole is fully covered, and the pin cannot be inserted.

Before entering the danger zone, each operator must insert his or her own personal padlock in the lock out slot. This means that the lock out device can be unlocked only once all padlocks have been removed, i.e., once all operators have exited the danger zone.
