TUOTEKUVAUS

Kahvat ja tarvikkeet sähkölukoille

Self-monitoring of cable tension

Unlike other similar solutions on the market, the Pizzato Elettrica remote escape release is equipped with an innovative mechanical control system which safely stops the machinery, if the cable is cut or loosened.
When the device is activated, the square control indicator is positioned at the "S symbol; in the event of a fault or anomaly, the square control indicator is positioned at the ⚠ symbol facilitating a quick diagnosis by the user.

A. Installation outside the chassis

B. Installation inside the chassis, on a perforated panel
